This non-fiction, family history narrative should appeal to a general audience. Story begins with the emigration of my eight great-grandparents from northern Europe and ends with my parents during World War II. It intertwines highlights from each character's life story against a historical backdrop--immigration in general, homesteading in Nebraska, oil drilling in 1915 Burma, the 1946 shipping of "war brides" to America, etc. In describing the lives of my ancestors, I bring up sociological and public health topics--maternal mortality, pre-marital sex, tuberculosis, alcoholism, sibling rivalry, dating in the 1920s, problems of stepmothers, etc. I have used family members to illustrate the human condition and produce a riveting story. I believe it will inspire, educate, and entertain.
