MATLAB variables are created with an assignment statement. The syntax of variable assignment is variable name = a value (or an expression) For example, `>> x = expression` where expression is a combination of numerical values, mathematical operators, variables, and function calls. On other words, expression can involve:

MATLAB GUI Graphical user interfaces (GUIs), also known as apps, provide point-and-click control of your software applications, eliminating the need for others to learn a language or type commands in order to run the application. You can share apps both for use within MATLAB and also as standalone desktop or web apps.
